DARIAN R. **NOCERA**

SUMMARY

*A self-driven, solution-oriented, **Full-Stack Web Developer** with over 4 years of diverse experience in the **software development life cycle**. As a recent **Coding Boot Camp** graduate, in addition to my varied experiences, I offer an expansive perspective and **aptitude** for learning applications outside of my current skill set, allowing me to **ensure success** despite the unique challenges presented by each project. I am **passionate** about helping others succeed, designing **innovative solutions** to tackle difficult problems, and creating beautiful and **functional web experiences.***

TECHNICAL SKILLS

- ❖ Visual Studio
- ❖ GitHub / GitBash
- ❖ CSS / CSS Frameworks
- ❖ Javascript / jQuery / Ajax
- ❖ Node.js
- ❖ XML
- ❖ FTP / FileZilla
- ❖ ServiceNow / Jira
- ❖ MATLAB

SOFT SKILLS

- ❖ Project Management ●●●●○
- ❖ Problem Solving ●●●●●
- ❖ Organization ●●●●●
- ❖ Time Management ●●●●○
- ❖ Communication ●●●●●

PROFESSIONAL EXPERIENCE

EPIC SYSTEMS CORPORATION   FEBRUARY 2016-**PRESENT**

Healthcare IT Consultant | *Remote/Travel*   AUGUST 2018-**PRESENT**

- ❖ **Security Coordinator –** As an interim project manager, developed an Excel tool to automate the accurate provisioning of one of 200 security profiles to over 6000 end users to a system containing sensitive patient data. Managed a team of 30 security leads across 16 specialties while onboarding a full-time replacement new to the role.
- ❖ **Clinical Application Specialist –** As the sole team member staffed to the project; managed, advised, and executed the implementation of an electronic health record (EHR) system for 3 emergency departments at a large accredited academic medical center. Proactively lead efforts to implement at least 20 key features on an existing system significantly behind on feature adoption, gaining executive-level recognition for improving patient care.

Implementation Project Manager | *Verona, WI/Travel*   MAY 2017 - JULY 2018

- ❖ **Application Manager –** Worked closely with subject matter experts to implement a newly developed EHR module for Triage Nurses for an organization with 200+ end users. Closed the project with a tight 6-month timeline, with minimal reported issues at go-live and 46% under budget.
- ❖ **Application Coordinator –** As part of an Enterprise install, managed a cross-functional team of six analysts to bring one of the Midwest's largest health systems live on the Emergency Department module, ultimately landing the organization in the top 5% among other community members for the same benchmarked metrics.

Quality Assurance Specialist | *Verona, WI*   FEBRUARY 2016 - MAY 2017

- ❖ **QA Project Lead -** Coordinated large quarterly events for teams to present new development and designs to subject matter experts for evaluation and approval to include in the next major version release. Awarded "Pit Crew" award for significant rallying and effort for the on-time release of a critical development project at risk of missing a committed deadline.
- ❖ **Patient Safety Process Lead –** Audited all reported patient safety issues and identified over 40% could have been caught during design review. Implemented team processes and protocols to catch issues early leading to better protection of patient safety and confidentiality. HIPAA certified.

EDUCATION

UNIVERSITY OF DENVER | *Denver, CO*   SEPTEMBER 2020
Full Stack Web Development Certification

PENNSYLVANIA STATE UNIVERSITY | *University Park, PA*   DECEMBER 2015
B.S. Biomedical Engineering, Chemical Engineering focus
